

/Users/sandrews/SSA  
/software/Smoldyn/github  
/Smoldyn/source/libSteve/Zn.h

```
graph TD; A["/Users/sandrews/SSA  
/software/Smoldyn/github  
/Smoldyn/source/libSteve/Zn.h"] --> B["stdlib.h"]; A --> C["stdio.h"];
```

The diagram illustrates a file dependency structure. At the top, a gray rectangular box contains three file paths stacked vertically: `/Users/sandrews/SSA`, `/software/Smoldyn/github`, and `/Smoldyn/source/libSteve/Zn.h`. From the bottom center of this box, two blue arrows point downwards to two separate white rectangular boxes. The left arrow points to a box containing `stdlib.h`, and the right arrow points to a box containing `stdio.h`. This indicates that the file `Zn.h` (or the directory it resides in) depends on both `stdlib.h` and `stdio.h`.

`stdlib.h`

`stdio.h`
