

detail::object\_api  
< handle >

handle

object

```
graph BT; object[object] --> handle[handle]; handle --> detail["detail::object_api<br>< handle >"]
```

The diagram illustrates a three-step vertical flow. At the bottom is a gray-shaded box labeled 'object'. A blue arrow points upwards from 'object' to a white box labeled 'handle'. Another blue arrow points upwards from 'handle' to a larger white box at the top labeled 'detail::object\_api' followed by '< handle >' on the next line. All boxes have black borders.
