

detail::generic_type

```
graph BT; A["class_< type_, options >"] --> B["detail::generic_type"]
```

A diagram illustrating a relationship between two C++ types. At the bottom is a box with a black border and light gray fill containing the text `class_< type_, options >`. A blue arrow points vertically upwards from the center of this box to the center of a box above it. The top box has a thin gray border and white fill, containing the text `detail::generic_type`.

class_< type_, options >
